Introduction and Definitions

This report "... Update 2007" is a successor of reports published as "Current Estimates and Trends in New Hampshire's Housing Supply: Update 2000." The Office of Energy and Planning (OEP) has been issuing this series of reports since the mid 1970's. The reports attempt to present data that show short and long term trends in housing construction and total housing supply.

The permit data here attempt to update the latest decennial census year data insofar as possible. The permit data are collected via an annual mail survey of municipalities. The OEP attempts to achieve full coverage; nevertheless a few municipalities each year do not return completed forms. The OEP also devotes considerable effort checking and refining survey returns to insure as much consistency as practical. The OEP does not conduct any field checks as part of the quality control process.

The Housing Supply series is intended to present the latest annual trends based on reported building permit activity. Data users, interested in long-term housing trends (which may span two or three census years), are urged to analyze patterns shown by combining decennial census years with mid-decade permit data. Year to year comparisons, that mix permits and census years, are not valid.

Definition Change

To the extent possible, the figures contained herein represent total housing units. In prior years (pre 1990), our data represented year-round housing units. This change was made because it has become impossible to distinguish between year-round and seasonal units based on construction characteristics. *All units* are included in the census and permit data. Some housing units have all the characteristics of year-round units, but are in fact used on a seasonal or leisure time basis.

The data user should remember that the decennial census is essentially a questionnaire asking persons to respond. It is not a detailed field survey of characteristics of housing units. The census effort is not aimed at quantifying or analyzing the seasonal or leisure home sector. Nevertheless, this sector does have an impact on the year-round data.

The problem of distinguishing between seasonal and year-round units also applies to the permit data. Building permits usually do not request information regarding intended use. For this reason, all permits issued for new dwellings are included in this report.

Reporting Problems

Not all communities respond to OEP's survey. A few towns do not maintain formal building permit systems. Some towns that do have a permit process still do not report to OEP. See "Municipalities Not Reporting" section below for those municipalities that did not report in any given year. For some non-reporting municipalities OEP has substituted data from the Bureau of the Census' C-40 data series. These municipalities did report their permits to the Bureau of the Census, or the Bureau imputed the data and OEP entered those data in the accompanying table. The C-40 series does not cover mobile homes.

Some of the towns without permits systems did respond to OEP.

Accounting for conversions is another difficulty in compiling housing supply data. Conversions may increase or decrease the total housing stock. There are many types of conversions; a dwelling could be converted to an office, or a single family home may be converted to two or more dwelling units. Many municipal permit systems are not adept at tabulating the pluses and minuses in dwelling units due to conversions. The same is true of demolitions. Often, a demolition permit does not require reporting the number of dwelling units involved.

The categorizing of row or town houses, often referred to as condominiums, is difficult. In the past, local officials were asked to report them under the single-family category. Nevertheless, this structure type has caused confusion among some local officials. Beginning with the 1990 report, any structure that is attached is reported as multi-family. The 1990 & 2000 censuses contain a housing category, "Single Family Attached." This category, since 1990, has been included in the Multi Family listing in this report series. The Single Family Attached units are included in Multi Family in this *Update: 2007* edition.

Usually, permits are valid for one year. Some permits never result in actual construction and the permit expires. Starting in 1990, OEP requested each municipality report any expired permits from the previous year. These figures should show the number of structures and units not completed due to the expiration of the building permit or change in plans by the builder. Without this information there is a possibility of double counting if a permit is re-issued. When expired permits are reported, OEP reduces the number of permits reported in the prior year.

Net Change of Dwelling Units

The accounting for expired permits, coupled with OEP's objective of tabulating net change of dwellings, can result in negative numbers. The numbers appearing in the "Net Residential..." columns are not permits issued per se. The figures in these columns represent net change of dwellings. For instance, a town could issue one permit for a single family home and three permits for demolition of single-family dwellings in the same year. Thus a minus two (-2) would appear in the appropriate "Net Residential" column.

2000 Census Figures

The 2000 census figures published in this report will not sum exactly to state totals. This is because unincorporated places are not included in this report.
